COLOUR MAGNETISM

Certain colours are said to change the way you feel.

Green, for instance, can make people hungry – which might explain why everyone loves to picnic in the park. And if you wear a mood ring, it tells the world exactly how you feel – sea green signifies relaxation, dark blue implies passion, pink that you are inspired or orange optimistic. By the way, if you find a red feather, it means you have good fortune. So we wanted to find out what happens when you throw pigments of colour in the water.

Look at that. Purely magnetic, right?

With the **extensive colour offer of the B&C T-shirts**, select your coolest colour and provide maximum attractiveness to your message.

If colour is key for your message, the quality of the decoration is a must. Check our Fabrics and Printability Excellence at the end of this chapter (p.167).

B&C CORE ATTITUDE OFFER

When value is key and you want to stay simple, the CORE line of B&C T-shirts is there for you. This line of 22 T-shirts includes core styles, such as the iconic B&C #E line or 14 women, men, fitted or not, sporty or urban styles. This line is exclusively made of 100% RING-SPUN cotton fabric and is produced with the highest attention to- and control of quality.

THE B&C QUALITY

Soft, RING-SPUN COTTON and dense, compact knit are the key for the B&C Core T-shirts quality. Offering you the best printing surface with incomparable softness to the touch and comfort, it's the market reference. And this quality comes in an ASTONISHING range of colours!

Exactly what you were looking for!

MY FAVOURITE SUBLIMATION T-SHIRTS

PRINTABILITY

Sublimation is a dye-printing technique that allows for your ideas to be displayed at their maximum potential. It frees your creative mind and allows “all-over” prints. You will be able to translate your emotions without technical boundaries. Sublimation produces: super bright designs and bold colours that look like a photograph, the designs do not fade away easily, the prints do not have texture and are weightless (as inks directly dye the fibres). If those T-shirts are the best support for the sublimation technique, they are of course also a perfect support for screen-printing (use polyester targeted inks) or embroidery.

STYLE

Your customers will love the modern look and versatility of the B&C TM062-TW063 Sublimation polyester Tee, and the soft hand of the sublimated prints on it. With its cool and comfortable fit, this duo has a fantastic drape due to its polyester composition, and an ultra soft-to-touch feel due to the quality of the fabric we developed for you.

EASY BRANDING SOLUTION

To perfect your customisation

B&C Inspire line, the B&C Sublimation and the B&C Triblend tees have no brand label located in the collar and, to make your life easier, a size chip only.

To optimise efficiency when sorting your T-shirts, we differentiated men/unisex and women styles. For men and unisex styles, size chips have a black background when for women fits they have a white background.

This easy branding solution allows you to complete the customisation of your T-shirt.

With B&C No Label Tees, **the UNIQUE and fully personalised T-shirt line you are dreaming of is already waiting for you.**

To enable you to follow all EU regulations, the composition label (complying with mandatory information and EU languages rules) is located on the left side seam of the style.

EXCELLENCE

QUALITY IS NOT A PRIVILEGE IT'S AN ATTITUDE

Our passion for quality knows no bounds, it is only matched by our drive to deliver the most inspiring contemporary collection for the promotional market. For us, every single detail needs to be absolutely perfect – from the colour and cut to the threads used to make the T-shirt itself.

MEET YOUR FAVOURITE FABRIC

Anyone who has ever owned a T-shirt has had a favourite one that has stood out as the best shirt they've ever owned. It made them feel better, smarter and more at ease when they wore it. But what made it so fantastic? The secret is in the fabric. All 44 B&C Collection T-shirts are made of RING-SPUN cotton, which is softer and smoother, both inside and out.

All our T-shirts use pre-shrunk fabric, because we know you want your favourite T-shirt to keep its original shape and to last. All our T-shirts are dyed following a strongly controlled process, to ensure colour fastness, because you don't want your favourite T-shirt to fade out. All our fabrics are carefully chosen. They must be durable, comfortable, soft and with premium printability. To ensure this premium quality level, we run Quality Controls on a daily basis, directly managed by the B&C team in the factories, helped by the fact that we based one of our offices in Asia.

RING-SPUN YARN

The long fibres are tightly twisted together (parallel, in the same direction), which results in a stronger, cable-like yarn. Ring-spun yarns ultimately yield a smoother, more durable fabric.

Finer, smoother, consistent knit

OPEN-ENDED YARN

With shorter fibres than ring-spun cotton, the fibres are wrapped around each other, resulting in a loosely bound, thicker yarn. Open-ended yarns often result in fabric with a rough hand.

Bulky, fuzzy, uneven knit

FIT AND STYLE

Are you looking for the best T-shirt for your message/brand? Relaxed and comfortable, always soft and emotional, we have a large selection of T-shirts, tank tops, styles and cuts.

We always carefully balance the elements to find the right combination of weight, softness, price and fit, to support the expression of your creativity.

PERFECT DECORATION MEANS GREAT VISIBILITY

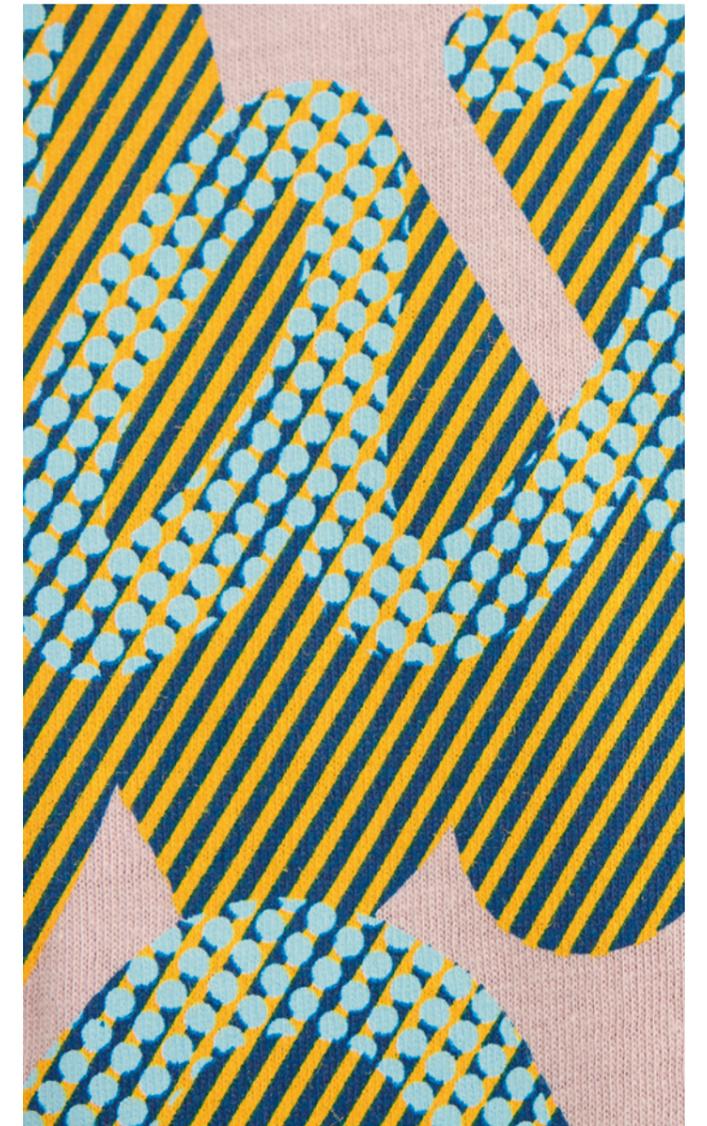

We take great care in the choice of all of our fabrics. Not only must they complement the styling of each garment and guarantee the highest level of comfort to the wearer, they must also deliver the highest QUALITY results in DECORATION. We TEST all our fabrics with various decoration techniques so you can be confident that whenever you choose a B&C T-shirt, you will have the perfect canvas for your brand or message.

All B&C Collection T-shirts are made of ring-spun cotton, which is softer and smoother, both inside and out

RESULT OF REGULAR SCREEN-PRINT TEST

Why settle for poor quality when you can have the retail look and feel? 100% ring-spun cotton fabric screen-prints better, heat transfers better, embroiders better and wears better.
